DEADLINE SAT 10 OCT · 10:00 UTC (11:00 UK)

TOTAL PTS	GW5	OVERALL RANK	SQUAD VALUE	BANK	FREE TRANSFERS

~~BENCH BOOST · GW2~~ ~~TRIPLE CAPTAIN · GW3~~ ~~FREE HIT · GW4~~ **WILDCARD · LIVE (USE BY GW19)** Second-half chips unlock from GW20. WC budget = £99.2m (sell values £99.1m + £0.1m bank).

01 THE CALL

RECOMMENDED · OPTION 1

Keep the Wildcard. Use both free transfers. Captain Bruno.

~~Tzolis £6.3m~~ → Saka £9.6m
ARS MID · v LEE (H) · model 5.9
GW6 / 32.3 GW6–11

~~Isak £9.0m~~ → Barry £5.7m
EVE FWD · at HUL · on pens · 3.7
GW6 / 21.7 GW6–11

(C) B.Fernandes
v TOT (H) · model 6.4 · haul≥10 21%
VC Saka · bank stays £0.1m · no hit

- **The damage is narrow.** Four flagged players, two of them attackers (Tzolis hamstring, Isak thigh). Both are replaced with no hit. Konsa (quad knock) and van Ewijk (stale hamstring flag) go to the bench.
- **The Wildcard edge is small.** The best WC draft projects only **+10.1 pts over GW6–11** (~1.7/GW) vs this patch, and it sells Bruno. Saving the chip keeps the option for Saliba's return (~Nov), clarity on João Pedro and City, and the next injury wave.
- **League angle.** You are 8 pts behind Bart, who has already used his WC (GW4) and has only the Free Hit left. You keep Haaland (shared) and gain on Bart through Bruno, Mbeumo and Saka.

02 FIVE OPTIONS AT A GLANCE

model xPts = XI + captain, no bench · derived

OPTION	TYPE	MOVES	HIT	GW6	GW6–8	GW6–11	VS ROLL
Roll — no moves	Baseline	0	0	50.9	159.2	321.8	+0.0
1 · Patch & Save	2 FT	2	0	55.6	167.5	337.2	+15.4
2 · Brentford pair	2 FT	2	0	54.5	166.7	335.3	+13.5
3 · WC model-max	Wildcard	8	0	57.9	173.3	347.4	+25.6

Considered: 3 moves (–4)	2 FT + hit	3	4	52.7	166.8	339.2	+17.5

Each WC option fills the £99.2m budget, with a max of 3 players per club. Full squads, line-ups and pros/cons are on pp.7–9. The –4 version (also Konsa → Gabriel) is 2.9 pts worse in GW6 and only 2.0 better over six GWs, so it isn't worth the hit.

02 LEAGUE-WIDE NEWS THAT MOVES DECISIONS

ARSENAL / MAN CITY / CHELSEA

- **Saliba** (back) is out; L'Equipe says he's targeting November. That keeps Konsa/Gabriel nailed once fit.
- ARS: Havertz has a hamstring problem (PI 25%). Rice is expected fit (rumour). Mosquera, White and Hincapié are back in training.
- **Man City were found guilty** on the PL financial charges and have appealed. Foden is suspended to 17 Oct; Semenyo 50%; O'Reilly 50%.
- CHE: **João Pedro** out to ~17/10 (PI; FPL flag 75% dates from 16 Sep). Palmer groin, 75%.

BOURNEMOUTH / LIVERPOOL / MAN UTD / SPURS

- BOU: **Alex Scott** quad, out 6–8 weeks (GW11 at the earliest). Kroupi and Kluivert also out, so **Tavernier** likely takes the penalties.
- LIV: Gakpo 50%, Ekitike out to ~Dec. Liverpool Echo: "nine players could miss" City.
- MUN: Dorgu hamstring. Mainoo, Amad, Rashford and Mazraoui 50%; de Ligt out. Bruno and Mbeumo fit.
- TOT: Porro out to ~19/10, van Hecke 50%, Kulusevski out.

EVERTON / BRENTFORD / BRIGHTON

- EVE: Mykolenko 50%. Barry fit and on pens.
- BRE: Damsgaard ankle "bigger injury". Thiago and Schade fit.
- BHA: Mitoma's return is being managed; Minteh out to ~24/10. Dunk and Struijk 50%.

COVENTRY / NEWCASTLE / OTHERS

- COV: Awoniyi suspended to 19/10 and Haji Wright out, so **Thomas-Asante** starts.
- NEW: Elanga, Dedic and Ramsey 25%; Burn 50% (mostly stale, 19 Sep).
- CRY: Mateta ~11/10, Disasi suspended to 25/10. IPS: Fatawu suspended to 17/10.

Model att/def are log-scale ratings from a ridge fit on GW1–5 fixture xG plus GW6 market λ (derived). Positive att = scores more; positive def = concedes less. Arsenal have the best defence by a distance (4.03 xGC). Lowest raw xG: Villa (4.56), Coventry (4.93), Spurs (5.02). After the fixture adjustment, the model rates Hull's attack weakest (−0.40).

G−xG > 0 = scoring above chance quality, which tends to regress. **Groß** (3 G / 4 A from 1.77 xG / 0.86 xA) and **Schade** (3 G from 1.52 xG) are running hot. **Thiago** (1 G from 3.13 xG) and **Barry** (2 G from 3.50 xG) are due. DC/90 = defensive contributions per 90 (DEF need 10, MID/FWD 12 for +2 pts). Richards (10.8), Silva (11.2), Muharemović (11.6) and Tarkowski (10.2) clear the bar on average.

YT AUTO-CAPTIONS VIA yt-dlp + youtube-transcript · FFS ARTICLES · COMPILED 5 OCT

Of the sources checked, only Harry, Mate, FFS and Planet FPL have published since the 4–5 Oct news (Haaland sub, Konsa knock, Scott injury, City verdict). The rest are 11–15 days old and pre-break. Names in captions are often mangled; uncertain ones are marked (?). Not covered: FPL BlackBox and FPL General (stale) and FPL Sonaldo (channel not found).

01 WHAT THEY SAID

FPL Harry

5 Oct · FRESH

"MY UPDATED FPL GW6 WILDCARD DRAFTS! So Many Injuries..!"

Wildcard: ~95% yes. Haaland is the only City player he keeps after the verdict. He's cutting Wissa (weak data, missed pen) and Van Hecke, and rules out Isak ("not worth the money"). Core across all 4 drafts: Muharemović, Silva, Groß, Haaland, João Pedro. Won't pay £8m for Gabriel. No GW6 captain named.

FPL Mate

5 Oct · FRESH (garbled captions)

"FPL GW6: Wildcard Team & Strategy (No Man City)"

Hypothetical WC draft, since he has already used his. **No City players at all.** Kelleher; Gabriel, Konsa, De Cuyper, Silva, Muharemović(?); Bruno, Saka, Rogers, Groß (+ probably Palmer); João Pedro, Gonzalo, Barry. **Captain Bruno** (Spurs at home), Saka the alternative. Rates Rogers better value than Palmer.

Let's Talk FPL

21–22 Sep · PRE-BREAK

"Wildcard team (Haaland AND Fernandes) / Early thoughts"

His own team isn't wildcarding (rolling). His WC draft: Verbruggen/Kinsky; Calafiori, Konsa, De Cuyper, Van Hecke, Silva; Groß, Saka, Schade, Tavernier, Bruno; Haaland, Gonzalo, Barry. **Captain Bruno or Saka.** Hold Bruno. Sell Sangaré before Szoboszlai.

FPL Raptor

"4 FREE TRANSFERS | MY FPL GW6 TRANSFER PLANS"

No WC (used GW4). Sell list: Szoboszlai, **Isak** (looks unfit, not worth £9.1m), **Slater** (dead slot). Plans: Slater → Groß/Tavernier plus Isak → Gonzalo. Aggressive version adds Isak → Barry. Tentative captain Haaland; "no standout".

FPL Focal

20 Sep · PRE-BREAK

"FPL GW6 TRANSFER PLANS"

No WC. Rolls if João Pedro is fit; otherwise Sangaré → King or Tavernier/Schade. Prefers a double Arsenal defence plus Saka; Gabriel not needed. Captain Palmer, VC Haaland. Leno and Affengruber for cheap Fulham defence.

Fantasy Football Hub

24 Sep · PRE-BREAK

"The PERFECT Wildcard Draft For GW6!"

Raya; Konsa, Van Hecke, Wöber(?), a Brighton CB, Hall; Palmer, Saka, Rogers, Groß, Schade; Haaland, Barry, Gonzalo. No Bruno; Haaland kept for GW7 Ipswich. **Captain Palmer.** The Hub AI's own WC included Le Fée(?) and Gabriel.

Fantasy Football Scout

24 Sep–5 Oct · articles

"GW6 WC best team · Scout Picks · injury news"

More than half of poll respondents are wildcarding. Pros: price rises, break injuries, Fulham's promoted-team run, Bournemouth's run to GW16. Cons: GW7 is a better Bournemouth entry and gives post-Europe info. Konsa knock 'nothing major'; Haaland sub pre-planned.

"Man City's Guilty Verdict | S.10 Ep.11"

Explicitly not covering FPL this week; GW6 and WC drafts are due on the Friday show. Their read on the verdict: likely "no punishment placed this season", but it's a mindset question mark for City players.

02 CONSENSUS VS YOUR PLAN

MOST-MENTIONED BUYS

Groß (every draft) · Saka (6) · Gonzalo (6) · Konsa (5, now carrying a knock) · Silva BOU (5) · Barry (4) · Muharemović (4) · Schade (4) · King (4) · Rogers (3) · Tavernier (3, now likely on pens).

MOST-MENTIONED SELLS

Szoboszlai · Sangaré · **Isak** (Raptor, Harry) · Wissa · City players other than Haaland · avoid Alex Scott.

HOW OPTION 1 LINES UP

- **Saka in, Barry in, Isak out**: matches the most common moves.
- **Captain Bruno**: Mate's and LTFPL's pick. Captaincy is split overall (Palmer: Hub, Focal; Haaland: Raptor) and everyone calls GW6 "no standout".
- **Wildcard**: only Harry is actually wildcarding. LTFPL, Raptor and Focal aren't; FFS says GW7 may be the better window.
- **Haaland**: everyone except Mate keeps him. So do you.
- **Groß skipped**: 7 G+A from 2.63 xGI, i.e. running ~4.4 above. Over GW6–11 the model has him at 22.2, behind Le Fée (24.9), whom you already own.

FOR

Fixes both injured attackers with no hit. Saka is the No.2 GW6 captain option in his own right (LEE at home; Arsenal λ 2.11 is the week's highest). Barry is on pens away at Hull (EVE λ 1.43, 28% goal proxy) and 2 G from 3.50 xG says he's due. Keeps the WC.

AGAINST

Konsa and van Ewijk stay flagged, so the bench is thin (Slater is first sub). All 3 Arsenal slots are used (Raya, Konsa, Saka), so Gabriel needs Konsa out. Only £0.1m in the bank.

FOR

Schade (form 12.0, 3 G) and Thiago (pens, 1 G from 3.13 xG, 30% goal proxy) as a buy-low pair. Leaves **£1.4m in the bank** and an Arsenal slot free for a later Saka/Gabriel move.

AGAINST

Triple Brentford (Ajer, Schade, Thiago), all at Villa in GW6. 1.9 pts behind Option 1 over six GWs. Schade's goals are well ahead of his 1.52 xG. Gives up Saka's captaincy cover.

Single-move fallback: if you'd rather bank a transfer, Tzolis → Schade alone (GW6 52.9, GW6–11 329.6) leaves 2 FT for GW7. Isak (50%) would then stay as bench cover.

FOR

Highest six-GW projection of any squad (+10.1 vs Option 1). Clears all four flagged players and the two dead slots. Gets Gabriel, Saka and Tavernier (likely BOU pens). DefCon-heavy cheap defence (Richards 10.8, Thiaw 9.0 DC/90).

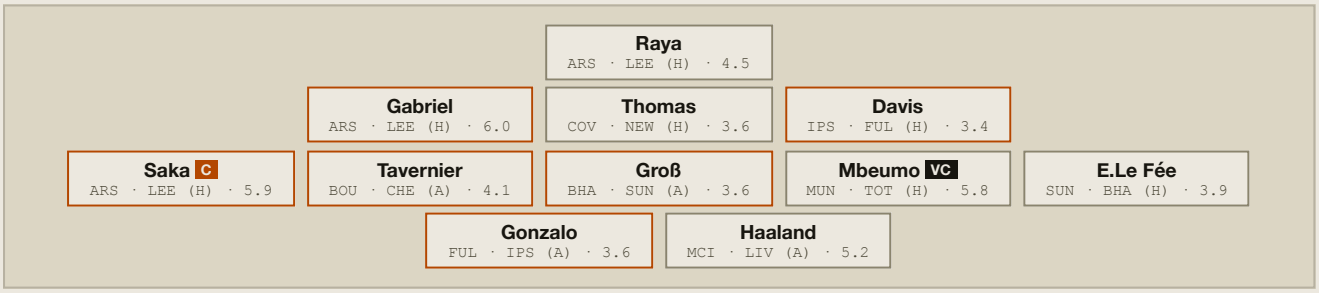

AGAINST

Sells **Bruno**, the model's top GW6 captain. Uses your last first-half chip for ~1.7 pts/GW. Richards, Thiaw and Thomas-Asante are 0.6–2.2% owned with little attacking threat. Leno is a bench GK only.

FOR

Built on the creator template: Haaland, Saka, Groß, Gonzalo, Silva and Muharemović forced in. Closest to what wildcarders will own, so it limits rank swings against them. Bournemouth/Leeds DefCon defenders for the long run.

AGAINST

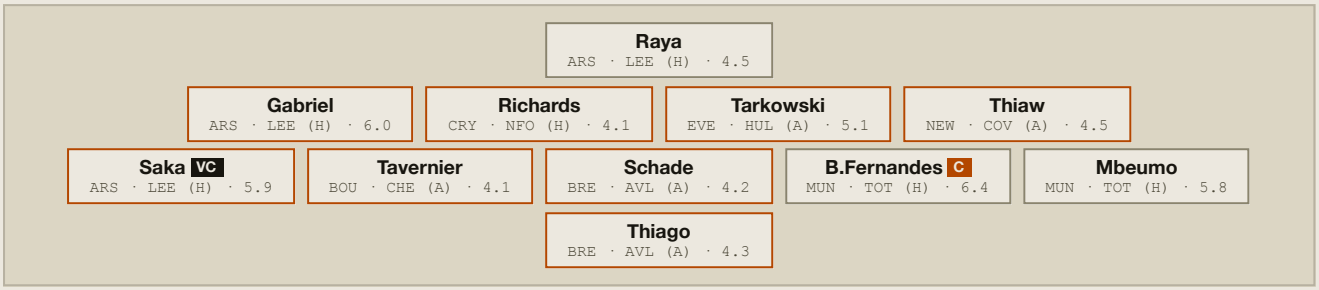

Lowest WC projection (only +3.5 vs Option 1). Groß is running hot (7 G+A from 2.63 xGI). Silva and Muharemović are projected bench in GW6. Also sells Bruno and De Cuyper.

FOR

Best GW6 score of any option (61.3), because Haaland at Anfield is his hardest fixture. Bruno can captain every week. Hedges any City fallout from the verdict; Haaland's £15.5m funds Gabriel, Saka, Thiago and Tarkowski.

AGAINST

Haaland is 73.9% owned and in Bart's team, so selling him is a huge swing risk. Haaland v Ipswich in GW7 alone is projected at 6.5. Trails Option 3 in 4 of 6 GWs (GW7, GW8, GW9, GW11). Ten changes.

ARMBAND: BRUNO (C), SAKA (VC)

Bruno has the highest expected score (6.4) against a Spurs side with a 14% clean-sheet chance and the league's 3rd-worst xG. He's also first-choice on penalties, and his 31% assist proxy is the best of the week. Saka and Mbeumo are statistically level with him on haul chance (~21%). Haaland at Anfield trails (5.2 xP, 55% blank).

RIVAL VIEW

8 of the other 14 managers in the league's top 15 (Bart included) captained Haaland in GW5. Haaland is in your team either way, so captaining Bruno is a **+1.2 xP** edge that only costs you if Haaland hauls at Anfield (~15%). Being 8 back, that's the right side of the variance.

How the simulation works: per-fixture xG/xA, minutes, CS and DefCon are taken from the projection model, with a simplified bonus rule. It tracks the model's EV to within ~0.3 for the main candidates (0.4 for Thiago), and its haul rates are meant for comparing players, not as exact probabilities.

Plan ahead & method

01 BEFORE SATURDAY 10:00 UTC

CHECKLIST

- **Thu–Fri pressers.** If Arteta clears Konsa, start him over Ajer. If City confirm a Haaland injury, re-plan: Haaland → Thiago is the obvious pivot.
- **Bookmaker scorer odds** should be out around Thu 8 Oct. Re-check Bruno vs Saka vs Mbeumo for the armband.
- **Make the transfers early.** Tzolis has already lost £0.1m and is at –9.8% toward another fall. Saka and Barry both rose this GW. Isak is flat (+0.4%). Option 1 leaves £0.1m, so it survives one more £0.1m rise on Saka or Barry, but not both.
- **Bench order** (Option 1): Kinsky · Slater · Konsa · van Ewijk.

WHEN TO PULL THE WILDCARD

- It must be used by the GW19 deadline. Candidate windows: **GW7** (post-Europe info, Bournemouth's run), or around Saliba's November return.
- Trigger if 3+ starters are flagged again, or if the City verdict ends in a sanction that changes their motivation.
- Next time, use it to clear the remaining dead slots (van Ewijk, Slater, Kinsky) and Konsa/Calvert-Lewin if their roles fade.
